Final Exam

- Find the **CONVERGED** elastic and piezoelectric constants of cubic zincblende AlAs.

  - Use same pseudopotentials and LDA functional as tutorial 7 (which was for hypothetical hexagonal wurtzite AlAs).

- Pass-Fail

  - "Pass" if all constants equal my results within ±1% of the largest element of each type.

  - "Pass Plus" if you include experimental results.

- Procedure

  - E-mail me your results, non-zero elements only, properly identified (NO complete output files).

  - I'll send you your grade, my results, and the set of input files I used to reach them.

  - drh@bell-labs.com, use subject line "UIUC Abinit final"
